AMCOM Life Cycle Management Command

Mission: Provide optimized and responsive Aviation, Missile and Test, Measurement and Diagnostic Equipment (TMDE) Sustainment support to the Joint Warfighter to enable sustainable readiness at the point of need.

Vision: A values based organization — people first, Soldiers always — enabling readiness to meet the emerging global requirements of the Joint Force.

Strategic Priorities

- 1** Strengthen the winning culture of our TEAM. Disciplined people — who have a passion for the job — who have disciplined thought and take disciplined action. Recruit, train and develop our great people.
- 2** Enable unit and equipment readiness of Aviation and Missile Systems for the Joint Warfighter.
- 3** Corpus Christi Army Depot and Letterkenny Army Depot as part of the Army's Organic Industrial Base are national treasures with unique capabilities that must remain viable through optimization.
- 4** Exercise good stewardship of resources — both dollars and manpower — through key metrics, command initiatives, and communication.

About AMCOM

Worldwide Logistics Support

Our team performs essential functions, including inventory management, of more than 29,000 spare parts and \$9 billion worth of inventory. Changing events require that our Soldiers are equipped and ready at a moment's notice.

Calibration and Metrology

The U.S. Army Test, Measurement, and Diagnostic Equipment Activity (USATA) performs the calibration and repair mission for Army, DoD elements and thousands of other customers.

Foreign Military Sales (FMS)

The Security Assistance Management Directorate manages international sales of U.S. Army Aviation and Missile Systems in coordination with the Project / System Managers and Prime Contactors.

Logistics Assistance Representatives

AMCOM carefully selects and trains experienced logisticians to serve as Logistics Assistance Representatives (LARs) supporting our Soldiers at their units and their forward locations when they deploy.

AMCOM Locations

AMCOM's two key Army depots, Corpus Christi Army Depot (CCAD) in Texas and Letterkenny Army Depot (LEAD) in Pennsylvania, have been designated as Centers of Industrial and Technical Excellence by the Secretary of the Army. AMCOM also has operational control of all aviation logistics management functions at Fort Rucker, Alabama, home of the Army Aviation Center. AMCOM oversees the maintenance and supply management of Fort Rucker's aviation fleet and directs about 100 government personnel and more than 3,500 contractors who perform that work.

Agency Data*

Number of Civilian Personnel: 8,800

Number of Military Personnel: 145
